Todd Merrill Studio represents an international group of established and emerging artists working at the intersection of art and design. Individually, through meticulous craftsmanship and rigorous studio experimentation, each strives break the previously set inherent limitations of conventional materials like wood, metal, plaster, concrete, ceramics, glass, and resin. Their intimate studio approach fosters an atmosphere of creativity where the work rendered significantly bears the hand of the artist. Collectively the artists are creating a new visual vocabulary that advances long-held, established artistic boundaries. Their groundbreaking, one-of-a-kind, works contribute to today's increasingly relevant idea of collectible design.
